Achint Kiran

achintkiran2701@gmail.com | linkedin.com/in/achint-kiran | achintk27.github.io | +1 (347)-217-1378 | New York, NY

Education

New York University — New York, New York
Master of Science (MS), Computer Science — 2026 - 2028

PES University — Bangalore, Karnataka
Bachelor of Technology in Biotechnology, Minor in Computer Science and Engineering — 2022 – 2026

Experience

Machine Learning Research Intern — Bangalore, Karnataka
Indian Institute of Science — Jan 2026 – June 2026

- Achieved 98% accuracy on held-out genomic test data by applying probability calibration techniques to the GNoMIX model for South Asian population.
- Improved GNoMIX performance on South Asian genomic data by adapting and retraining the model for population-specific analysis.
- Built Python and R pipelines for quality control and feature extraction across high-dimensional genomic datasets.
- Processed 2 TB of genomic data on an HPC cluster using SLURM, orchestrating 170+ CPU-hours for distributed model evaluation.

Software Engineering Intern — Hyderabad, Telangana
Aganitha AI — June 2025 – Aug 2025

- Streamlined analysis workflows across 50+ tools by building a MCP server for integrated services.
- Automated processing of 1,000+ structural biology files by integrating 50+ analysis tools through Python, Google ADK, and LLM APIs.
- Designed modular REST interfaces and data-abstraction layers to support reliable data exchange across services.

Software Engineering Intern — Bangalore, Karnataka
Ernst & Young (EY) — June 2024 – Aug 2024

- Cut model release time by 30% by replacing manual deployment steps with automated Azure Function Apps workflows and real-time status monitoring.
- Shipped three internal web applications using React, Node.js, and REST APIs, including an AI chatbot for EY's internal website.
- Increased user engagement by 25% through interactive React components and real-time data visualizations.

Technical Skills

Languages: Python, C/C++, JavaScript, SQL, HTML/CSS.
Frameworks and Libraries: PyTorch, React, Node.js, Streamlit, Scikit-learn, OpenCV, Google ADK.
Cloud and DevOps: Azure, Firebase, Vercel.
Tools/APIs: Git, SLURM, MCP, REST APIs, Resend.
AI Development Tools : Codex, Claude Code, Gemini

Projects

Lab Equipment Scheduling Platform | *React, Firebase, Node.js, Vercel, Resend* — **LINK**

- Built and deployed a lab scheduling platform used by 200+ users, replacing a manual reservation workflow.
- Prevented conflicting equipment reservations by implementing authenticated booking flows and server-side availability checks for concurrent requests.

Automated Pipeline for Genome Analysis | *Python, React, SQL, GWAS, ML models*

- Built an automated feature extraction pipeline in Python to parse raw FASTA/VCF files, improving data processing speed by 50%.
- Trained ML models achieving 85% accuracy in SNP classification through automated variant filtering.
- Added modular input validation and structured logging to identify processing failures across chromosome datasets.
