EDUCATION

New York University

New York, New York

Master of Science (MS), Computer Science

2026 - 2028

- **Relevant Courses** : Algorithms, Computer Vision, Virtual and Augmented Reality

PES University

Bangalore, Karnataka

Bachelor of Technology in Biotechnology, Minor in Computer Science and Engineering

2022 – 2026

- **Relevant Courses** : Data Structures, Algorithms, OOP, Operating Systems, Database Management Systems.

EXPERIENCE

Machine Learning Research Intern

Bangalore, Karnataka

Indian Institute of Science

Jan 2026 – June 2026

- Adapted and trained the GNoMIX model to improve performance on South Asian genomic data.
- Developed Python and R data-ingestion routines for quality control and feature extraction on high-dimensional datasets.
- Orchestrated 170+ CPU-hours of distributed data processing across an HPC cluster.
- Applied probability calibration techniques to a classification model achieving 98% accuracy on held-out test data.

Software Engineering Intern

Hyderabad, Telangana

Aganitha AI

June 2025 – Aug 2025

- Built a Model Context Protocol (MCP) server integrating 50+ analysis tools to automate workflows across existing services.
- Automated processing of 1,000+ structural dataset files using Google ADK, LLM APIs, and Python.
- Designed modular REST interfaces and data abstraction layers to support data exchange across integrated services.

Software Engineering Intern

Bangalore, Karnataka

Ernst & Young (EY)

June 2024 – Aug 2024

- Shipped 3 internal web applications using React, Node.js, and REST APIs, integrating an AI chatbot into EY's internal website.
- Automated model deployment using Azure Function Apps, reducing deployment time by 30%.
- Created interactive React UI components, driving a 25% increase in user engagement through real-time data visualizers.

Teaching Assistant - Health Informatics

Bangalore, Karnataka

PES University

Jan 2025 – May 2025

- Mentored 25+ students on programming logic and graded assignments, clarifying core technical concepts.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, SQL, HTML/CSS.

Frameworks and Libraries: PyTorch, React, Node.js, Streamlit, Scikit-learn, OpenCV, Google ADK.

Cloud and DevOps: Azure, Firebase, Vercel.

Tools/APIs: Git, SLURM, MCP, REST APIs, Resend.

AI Development Tools : Codex, Claude Code, Gemini

PROJECTS

Lab Equipment Scheduling Platform | *React, Firebase, Node.js, Vercel, Resend*

URL: pesbiotech-lab.vercel.app

- Built a lab equipment scheduling platform using React, Node.js, and Firebase, serving 200+ users.
- Implemented concurrency controls to prevent conflicting reservations for the same equipment and time slot.

Automated Pipeline for Genome Analysis | *Python, React, SQL, GWAS, ML models*

- Built an automated feature extraction pipeline in Python to parse raw FASTA/VCF files, improving data processing speed by 50%.
- Trained ML models achieving 85% accuracy in SNP classification through automated variant filtering.
- Added modular input validation and structured logging to identify processing failures across chromosome datasets.
